

Thiago Temple

PLURALSIGHT AUTHOR

Thiago Temple is a Brazilian developer based in Ottawa, Canada. He has been building software for more than fifteen years, and his professional interests are mostly related to web development both for the client and server. For most of his career, he has been working with Microsoft related technologies such as C# and ASP.NET, and also with JavaScript and many of its frameworks and libraries. In spite of that, he likes to experiment and learn from/with different technologies and languages. When he's not working or doing programming related stuff, he's spending time with his family, reading books, or playing board games.
