Compiled Code Doesn't Get Stale

The screenshot shows the Stack Overflow interface. At the top, there is a search bar with the text "Search...". Below the search bar, the left sidebar contains navigation links: "Home", "PUBLIC", "Stack Overflow" (highlighted), "Tags", "Users", and "Jobs". The main content area displays a code snippet in a light blue box: `//FIXME: fix this before the 1.0 release`. Below the code, there is a comment that says "they were on version 4", which is underlined in red. To the left of the comment, there is a "4 votes" indicator and a "share" link. To the right of the comment, there is a timestamp "edited Jul 25 '11 at 7:58" and a "community wiki" section indicating "2 revs, 2 users 80%" and the name "David Maynor".
