(Sort of)

React as You Know it

it (Sort of)

```
let counter =
    FunctionComponent.Of(fun (props: {| InitialCount: int |}) ->

        let counter = Hooks.useState (0)

        div []
            [ button
                [ OnClick(fun _ ->
                    counter.update (fun s -> s - 1)) ]

                [ str " - " ]

              h2 [] [ str <| sprintf " %i " counter.current ]

              button
                [ OnClick(fun _ ->
                    counter.update (fun s -> s + 1)) ]

                [ str " + " ] ])
```
